

## Our Local Area – St Margaret's

During this unit, the children will begin by exploring aerial photographs of the local area. The children will discuss what they can see from these images – what is shown and how that looks different from the sky. The children will then deepen this understanding through basic map reading. They will look at the features shown on a map and how these are represented using a key. From this experience, the children will be able to design their own map of the local area using a simple key.
