

We would be grateful if parents and carers can please not film, photograph or record school events in any way. We have some vulnerable children in our school community whose identity must be protected.

With the development of facial recognition software, it is essential that images are not shared on social media. As such, we cannot allow photography or filming of children at any school events, including concerts, productions or sports days.

Where possible, we do try to arrange a photographer to record images of these events which we can often share with parents in school publications and online. We are able to control the use of these, which ensures the ongoing safeguarding of our children.

Anyone seen using cameras or phone cameras as these events will be asked to delete images.

Many thanks for your continued cooperation.

St. Stephen's School
